

# X<sup>th</sup> INTERNATIONAL SYMPOSIUM ON IRRIGATION OF HORTICULTURAL CROPS

SOUTH AFRICA 2023

Dear colleagues,

We are developing an exciting and varied programme for this Symposium, set in the scenic horticultural powerhouse of South Africa, including the Cape Winelands. We have lined up an interesting set of session themes with excellent international and local invited speakers (details to be made known soon on the symposium website). But we are keen to receive your abstract on any topic relating to the irrigation of horticultural crops. Please go to the website and submit your abstract as soon as possible!

The last day of the Symposium, the Technical Day, will be dedicated to practical, applied aspects of irrigation technology and approaches. The sessions will include applied scientific presentations or posters, and an interactive panel discussion with practitioners and experts from the private sector.

- What is on the horizon for innovation in this field?
- What can we learn from real-life experiences and the needs of irrigation farmers?
- What are the current and future challenges that must be overcome with the help of excellent research?

Visit our website <https://ishsirrigationsa2023.com/> for the latest updates on the scientific programme, gala dinner, accommodation options, touring in South Africa and much more.

To register please go to: <https://ishsirrigationsa2023.com/registration/>
